PROFILE

Full Stack Developer with hands-on experience building AI-powered applications and scalable web/mobile systems — including RAG pipelines, LLM integrations (Google Gemini, Claude), vector databases (ChromaDB), real-time WebSocket architectures, and IoT dashboards. Proficient in React, Next.js, Node.js, TypeScript, and PostgreSQL. Actively uses AI coding tools (Cursor, Claude Code, GitHub Copilot) throughout the development lifecycle.

TECHNICAL SKILLS

AI / LLM	Google Gemini API, Claude API, RAG pipelines, ChromaDB (vector DB), embedding workflows, SSE streaming, prompt engineering
Frontend/Mobile	React, Next.js, Angular, Flutter, JavaScript, TypeScript, Tailwind CSS
Backend	Node.js, Express.js, .NET, Go, PHP
Database	PostgreSQL, MySQL, Firebase
Tools & ORM	Prisma, Git, Postman, Figma, Docker, ChromaDB
AI Dev Tools	Cursor, Claude Code, GitHub Copilot, Gemini — used actively in production workflow

WORK EXPERIENCE

Full-Stack Developer Intern — Bus Virtual Card System

Dec 2025 – May 2026

Bussing Transit Co., Ltd. | React · Node.js · Prisma ORM · LINE LIFF

- Built production digital bus card system for ticket purchase & online payment, live with real public bus passengers across LINE LIFF and web.
- Implemented LINE Login & Email Login with secure session management; designed full backend schema with Node.js and Prisma ORM.

Frontend Developer Intern — Bus Counter Dashboard

Dec 2025 – May 2026

Bussing Transit Co., Ltd. | React · Linux Bash

- Built real-time dashboard for camera feeds, live maps, and operational activity monitoring; automated bash scripts for video recording pipelines.

SELECTED PROJECTS

Knowledge Assistant — AI-Powered Document Chat

2026

Next.js 16 · TypeScript · PostgreSQL · ChromaDB · Docker · NextAuth · Google Gemini

- Built authenticated web app for AI-powered document Q&A; supports PDF/TEXT uploads with RAG pipeline (chunk → Gemini embedding → ChromaDB retrieval) and SSE streaming responses.
- Implemented JWT/bcrypt auth, token usage tracking per message and per session, Gemini API key rotation, rate limiting, and full Docker Compose deployment with healthchecks.

Eleven Lineup — Premier League Lineup Builder

2026

Next.js 15 · React 19 · TypeScript · PostgreSQL · Prisma · JWT

- Built interactive drag-and-drop pitch UI with @dnd-kit; custom JWT auth in HTTP-only cookies with RBAC via Next.js Edge Middleware.
- Designed PostgreSQL/Prisma schema for user profiles, real-time social community features, and streak-based daily prediction minigames.

Patient Management System — Real-Time

2026

Next.js 16 · TypeScript · Tailwind CSS · WebSocket · Railway

- Built clinic real-time system where staff see patient form data instantly as it's typed; features typing indicators (Active/Inactive/Submitted), debounce optimization (300ms), and late-joiner cache.
- Integrated Ping/Pong keep-alive, auto-reconnect every 3s, and custom Node.js server combining Next.js + WebSocket on a single port for Railway deployment.

Childcare Management System

2026

Next.js 16 · TypeScript · PostgreSQL · Prisma · Tailwind CSS · Zustand · iron-session · Vercel

- Built full-featured childcare center management system covering children enrollment, daily attendance (QR/teacher check-in), development tracking across 5 domains, daily activities, announcements, payments, and savings — with offline sync support.
- Designed public parent-facing pages via QR for check-in and savings balance; implemented academic-year-scoped data model with CSV/PDF report export and role-based access.

Soil Mineral & Moisture IoT Dashboard

2024–2025

Angular · Firebase · ESP32 · C++ · RS485 NPK · GPS

- Engineered ESP32 firmware integrating RS485 NPK sensors and GPS to collect real-time soil mineral and moisture data to Firebase.
- Built Angular dashboard with role-based access for multi-device management and a recommendation engine for crops and fertilizers.

EDUCATION

Maharakham University

Graduated 2026

Bachelor of Science in Computer Science, Faculty of Informatics
